

A Moth for Amy

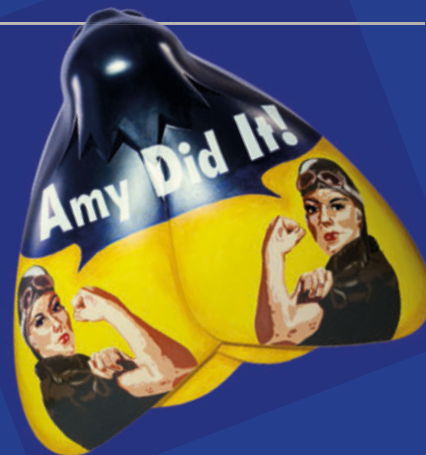

A Moth for Amy is an animal sculpture trail with a difference.

Inspired by Amy Johnson's beloved Gipsy Moth aeroplane, in which she made her epic flight to Australia, a flutter of exotic giant moths has alighted on walls and plinths across Hull, the East Riding and beyond!

Saffron Waghorn, East Riding based sculptor and stone mason, created the original sculpture, from which

our flutter of Moths has hatched. The 59 Moths, each measuring almost 1.5m across, have been decorated by artists and community groups, making each Moth a unique work of art. The designs are inspired by Amy Johnson's achievements, her flight to Australia and the era in which she lived.

We invite you to discover our joyful, colourful and inspirational Moths. Happy hunting!

Moth Hosts

Amy Johnson Festival would also like to thank those businesses and individuals who have provided extra landing spots for Moths.

Allenby Commercial, Cerutti's Hull, Citycare, Freedom Centre, Fudge Food, Hull ScrapStore, Hull Truck Theatre, Places for People, The Cheethams, Trinity House

AMY JOHNSON FESTIVAL

A Moth for Amy is an Amy Johnson Festival project. Amy was one of the most influential and inspirational women of the twentieth century. She was the first woman to fly solo from England to Australia and set a string of other records throughout her career. Our festival celebrates Amy's life, achievements and legacy with a wide ranging programme that aims to appeal to all interests and ages. The festival will raise awareness of Amy Johnson's achievements as an aviator, as an engineer and as a woman of her time, one of the first truly international celebrities.

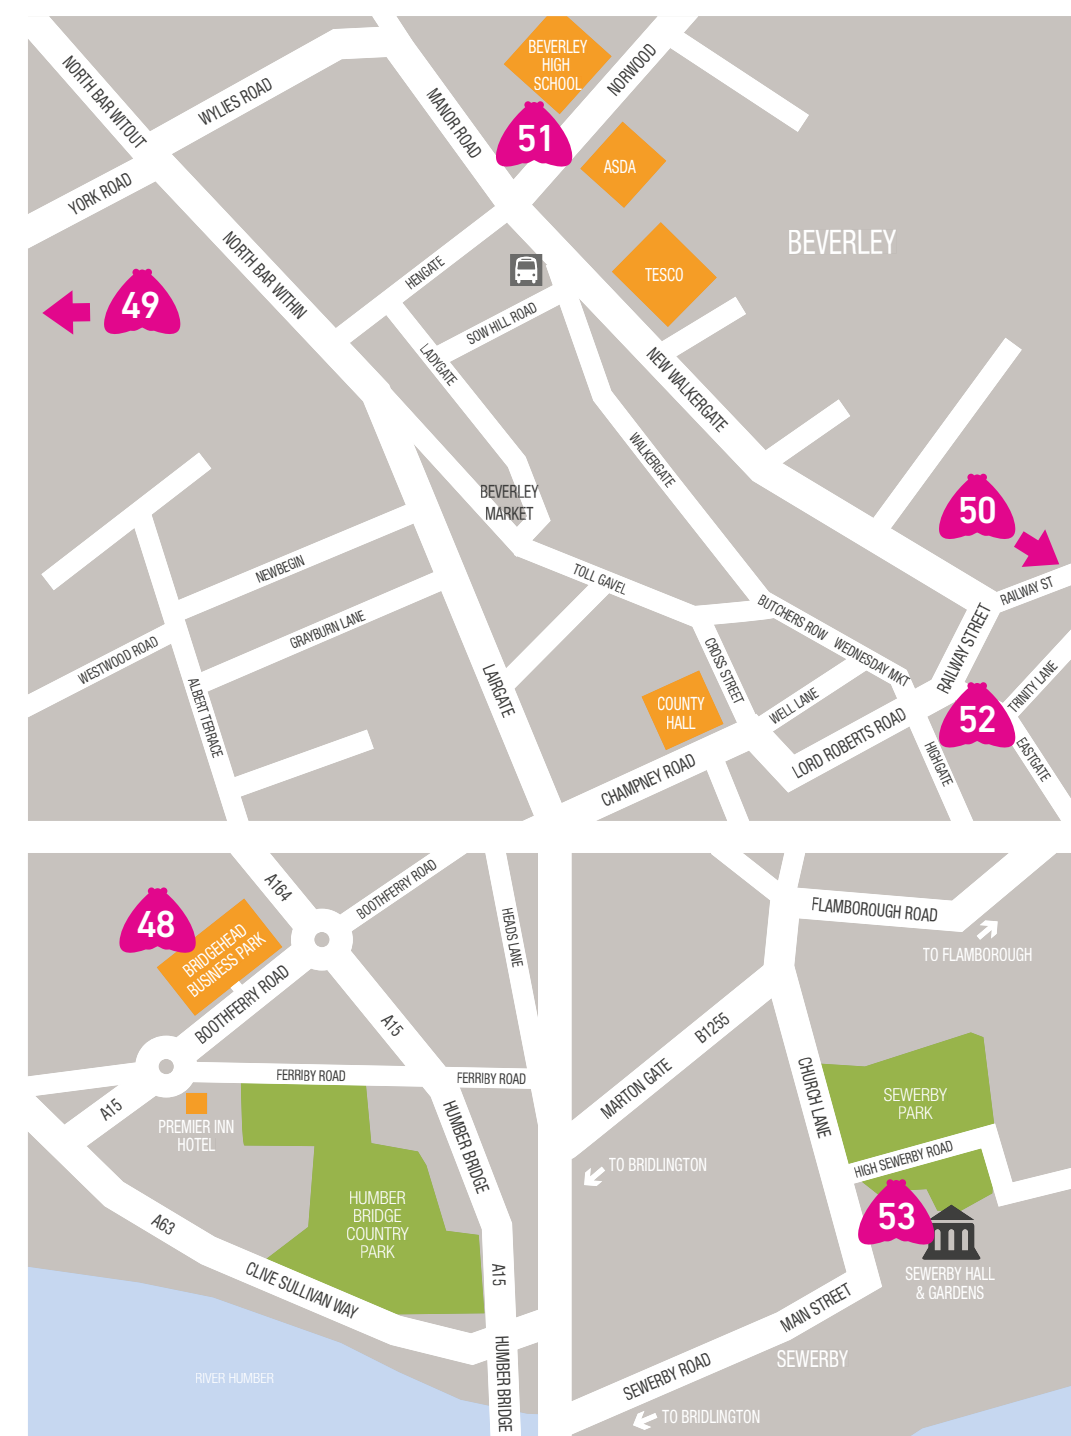

Amy's amazing story of adventure, glamour and tragedy has been an inspiration to artists and organisations who have brought Amy to life with imagination and ingenuity! From kites to comics, Leonardo da Vinci machines to cardboard planes, films to fantasy, the festival re-imagines Amy's world through the lens of today. But above all, Amy is a fantastic role model for young people in general and young women in particular – a woman of unstoppable determination, engineering and aviation skills.

For more information about Amy Johnson Festival visit amyjohnsonfestival.co.uk. You can also view our range of Amy Johnson and Moth for Amy products including mugs, postcards, posters, colouring books and the beautiful 'Amy Johnson, A Life in Pictures' book here.

Moth Facts

- ▲ Moths are able to use the moon and stars to navigate.
- ▲ The fear of moths is called mottephobia.
- ▲ The world's biggest moth (apart from Amy's Moths!) is the Atlas or Hercules moth with a wingspan of up to 27cm.
- ▲ Some moths are notorious for their ability to impersonate other animals. To avoid being eaten, they have evolved to look like less palatable insects, such as wasps, tarantulas and the praying mantis. Some moths even mimic bird droppings.
- ▲ In some parts of the world, moths are a major food source for people. Caterpillars are packed with protein and healthy fats, and research shows that 100 grams of these insects provides more than 100% of the daily requirement of some vital minerals, such as potassium, calcium, zinc and iron.
- ▲ Aeroplane designer Geoffrey de Havilland named 11 planes after moths, including the Gipsy Moth.
- ▲ Amy Johnson made her epic flight to Australia in a de Havilland DH60 Gipsy Moth aeroplane named Jason, which is now displayed in The Science Museum, London.
